

Choose from five categories of art glass texture to achieve your decorating goals:

Dramatic

The Dramatic Textures speak with their own voice. Background images become secondary as the character of each glass panel takes center stage.

Transformational

Using the background as raw material, the Transformational Textures shape, bend and skew what lies behind into new and fascinating forms.

Privacy

In your personal spaces, the Privacy Textures turn the harsh reality of the world into a soothing blur.

Softening

The Softening Textures preserve the background image while adding delightful individual character.

Impressionist

Lending intrigue and mystery to the images behind, the Impressionist Textures invite a closer look.

*P*lease open to see all available textures.
